Dear Marco and Jan,

This grant proposal is for a national competition. It is a very competitive one (success rate is usually 1 out of 20) but it is the only national competition that finance basic research. The total budget is around 240.000 euro for three years.

As regarding your potential involvement, it could be kept at minimum (10 hours per month), in a supervisory role. Of course, you can also decide to not be involved (formally). The reason I came to you was that in WP3 of the Learnvul, there is an activity in which it said that you can assist in writing a grant proposal.

But I realize that I came late with the writing, so I am happy to receive potential suggestions (to include, exclude, change) based on what I sent this morning. A more complete version will be sent on Friday evening, if by any chance you can also have a look on it on Monday morning. Monday afternoon is the deadline, but it is easy to upload a pdf file.

As concerning your involvement, it could be nominated now (in case in which it will be easy to higher you by my university if the application is successful), or could be an unominated position, a case in which I neee to organize a competition for the vacant position.

For being nominated, you will need a brainmap account, that I am happy to assist you.

I hope these info helps!

Dear Jan and Marco,

Please read sections C1 (completed) and C2 (almost completed) in the attached document that represents the core idea of the new grant proposal. I did not have time to complete the other sections, but those currently blank sections are a bit more algorithmic. Section C1 (the idea) and section C2 (the way to operationalize the idea) are highly content-oriented, so I focused on that part of the document.

I intend to finish most of the sections by Friday evening in case you want to have a second look or to check whether I respond appropriately to your recommendations/suggestions.

If I understood correctly, Jan will be on holiday starting Friday evening, but Marco could still be available. My suggestion is to receive your feedback by Friday evening/night on C1 and C2 sections. I will integrate these in a revised version that will also contain other sections completed on Saturday. If there is time, I would appreciate a follow-up message on Monday morning, as Monday is the deadline for uploading and sending the application (at 4.00 PM your time).

During this weekend (Saturday, Sunday, and Monday), I will be in Amsterdam for family reasons (but I will continue working now on then to complete the application).

Concerning the manuscript, I wanted to introduce a line to mention Catalina's recently accepted paper. Still, it is difficult to concentrate at this early hour (after a night without sleeping so far). Therefore, you can submit it from my side, regardless of whether you introduce or not a line referring to that paper.

Kind regards,
Florin

Hi Florin,

Please find some comments and suggestions in the attached document. As you know, my own research interests are moving away from EC. Although I like some of the ideas in the proposal and added some other ones, I would prefer not to be involved in the project in any official way.

Good luck with finalizing the proposal and fingers crossed that you will get the funding.

Time for me to start my holidays.

Best regards,

Jan

Hi Florin,

sorry for the late reply. Below there are a few comments, especially one suggestion.

Concerning the grant application, my fear is what you mean by being hired by your University. I don't think I can be hired, given my contract with the Bicocca. I can be given (reasonable) permissions to work on something external, but not to be formally hired by another university, unless perhaps I change my contract here and become part-time, which is not something I will consider doing.

In any case, there is no way I can understand if it is feasible in some ways to be hired, which it is not except for the part-time.

The bottom line is that I'm ok with being involved in some informal way should the project be funded, but I cannot be involved formally, at least at this point in time.

Best,
Marco

PROJECT TITLE (ROMANIAN)

Învățare și nevrotism. O abordare funcțională.

PROJECT TITLE (ENGLISH)

Learning and Neuroticism. A functional approach.

PROJECT ACRONYM

LEARNVUL PHOBIA

PROJECT EXECUTIVE SUMMARY (ROMANIAN)

Întrebarea teoretică fundamentală este dacă, din perspectiva învățării evaluative, persoanele nevrotice manifestă o distorsiune spre negativitate, reprezentând un factor de vulnerabilitate pentru apariția tulburărilor mintale, sau dacă persoanele nevrotice nu manifestă o distorsiune spre negativitate. Cu toate acestea, ei tind să reacționeze mai intens la stimuli cu valență pozitivă sau negativă, transferând mai multă valență de la un stimul la altul. Proiectul actual continuă munca noastră anterioară care investighează dacă N moderează condiționarea evaluativă (EC) și va include trei studii empirice. Obiectivul primului studiu este de a testa dacă N moderează efectul EC într-un design care depășește limitări ale studiilor anterioare: (i) introduce stimuli necondiționați cu relevanță personală; (ii) oferă o legătură realistă între US și CS, conducând la un studiu valid din punct de vedere ecologic. Al doilea studiu examinează reacțiile ulterioare la stimulii condiționați (CS) care au dobândit o valență. Vom colecta reacții la nivel cognitiv, emoțional și comportamental. Ipoteza generală este că N moderează nu numai modul în care oamenii evaluează CS-urile, dar și reacția lor cognitivă, emoțională și comportamentală față de CS este mai intensă, controlând pentru magnitudinea efectului EC. Al treilea studiu va explora interacțiunea N-EC, acordând atenție unei alte faze de învățare (contracondiționarea) și controlului unor variabile potențial confundate (anxietatea și depresia).

PROJECT EXECUTIVE SUMMARY (ENGLISH)

The fundamental theoretical question is whether, from a perspective of (evaluative) learning, Neurotic people are indeed more biased towards negativity, thus representing a vulnerability factor for the onset of mental disorders, or whether Neurotic people do not manifest a negativity bias. Still, they tend to react more intensively to positively or negatively valenced stimuli by transferring more valence from one stimulus to another. The current project continues our previous work that investigated whether N moderates evaluative conditioning (EC) and will include three empirical studies. The objective of the first study is to test whether N moderates the EC effect in a design that overcomes two main limitations of the past studies: (i) introduces personally relevant USs; (ii) provides a realistic link between USs and CSs, thus leading to a more ecologically valid study. The second study examines the subsequent reactions to the conditioned stimuli (CSs) that acquired a valence. We will collect reactions at cognitive, emotional, and behavioral levels. The general hypothesis is that N not only moderates how people evaluate the likability of CSs, but also their reaction to the CSs is more intense, even when controlling for the magnitude of the EC effect. The third study will explore the N-EC interaction while paying attention to another learning phase (i.e., counterconditioning) and controlling for potential confounders (clinical intensity anxiety and depression symptoms).

ANEXA 12 - ACORDUL CONDUCĂTORULUI DE DOCTORAT

Cererile de finanțare unde există doctoranzi nominalizați în echipa de proiect, trebuie să fie însoțite de Acordul conducătorului de doctorat, în limba română (conform Anexei 12). Acordul trebuie să prezinte atât legătura dintre tema proiectului și cercetarea doctorală, cât și timpul de lucru alocat de doctorand pentru implementarea proiectului. Acordul conducătorului de doctorat nu este necesar în situația în care acesta este membru în echipa de proiect.

ANEXA 13 - REPREZENTANT LEGAL*

Cererea de finanțare trebuie să fie însoțită de o Declarație de consimțământ privind prelucrarea datelor cu caracter personal (Conform Anexei 13). Va fi completată și semnată de către Reprezentantul Legal.

Exploratory Research Projects (ECP)

Purpose:

Supporting and promoting fundamental scientific research, and/or explorers in Romania. The program is addressed to researchers with performances demonstrated by the quality and international recognition of scientific results, including those who work abroad (Romanian citizens or foreigners) and wish to conduct high-level scientific research projects in Romanian institutions.
